DAY – 02, 09 – 11 – 2021 (TUESDAY)

Hi sir, this is pranesh valan p from coimbatore, tamilnadu, India. Today I have learned about how to uninstall KDE plasma workspaces and gneoum Linux os, and after that I have installed again with a use of the command called username and password and I have installed with the Code using yum grouplist and the second code is yum group install "GNOM Desktop Graphical Administration tools" and the third step is to add the sudo yum group install "GNOM Desktop Graphical Administration tools" and after that final step to reboot the system using GNOM os. In the second session we they teach about problem solving to learn about all the techniques in logical skills, that's all about today, thank you.
